

BEAN GRINDER

Eureka Prometheus

Offering a daily output of up to 20kg, the Eureka Prometheus is a commercial on-demand coffee grinder for the busy commercial venue serving moderate quantities of coffee.

The touch-screen display offers three doses; however, the automatic filter holder recognition negates the need for manual dose selection. In addition, the position of the Diamond Inside burrs is electronically adjustable from the touch display and regulation knob, meaning that the user can select the grind required.
