

ESPRESSO

Rancilio Speciality RS1

Produce multiple cups of speciality coffee at a time with the Rancilio 3 Group. This machine allows the busy barista to make up to 500 cups of coffee per hour. The pre-infusion function of this machine means that the water pressure starts low before ramping up to 9 bar of pressure, allowing for a smooth extraction of the grind.

In addition, the machine features two steam wands and three group heads controlled by soft touch buttons. Each group head can be cleaned independently while your machine is still operating so the busiest coffee shop can keep up with the demand for incredible coffee even during busy periods.

CUPS PER HOUR	500	POWER SUPPLY	SP30 AMP 3PH
